

ASH BASINS:

EXPECTED VS. ACTUAL CONDITIONS

Expected ash basin condition

Actual ash basin condition

EXPECTED CONDITIONS

1. Water level > 30' below surface
2. Increasing ash strength with depth
3. Stable for highway construction

Ash Sample from 2016 CSVT studies

ACTUAL CONDITIONS

1. Saturated ash within 10' of surface
2. Ash consistency similar to a toothpaste or a milkshake
3. Essentially no strength
4. Unstable for highway construction
